Art Unit: 1743

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 21-24 been renumbered 20-23. The following is an examiner's statement of reasons for allowance: the art of record fails to teach or fairly suggest that a special orientation between two types of sensors in an array of a plurality of sensors will have a noise relationship that can be used to remove the noise from one of the sensors. The art of record recognizes that there are orders in which a sample needs to contact an arrangement of different sensors to prevent interference and it teaches the use of the signal of a second sensor to remove interference of signal on a first sensor from a sensitivity to a second substance that is not intended to be measured.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art relates to interference in sensors.
